

# Power Platform Architecture

Power BI

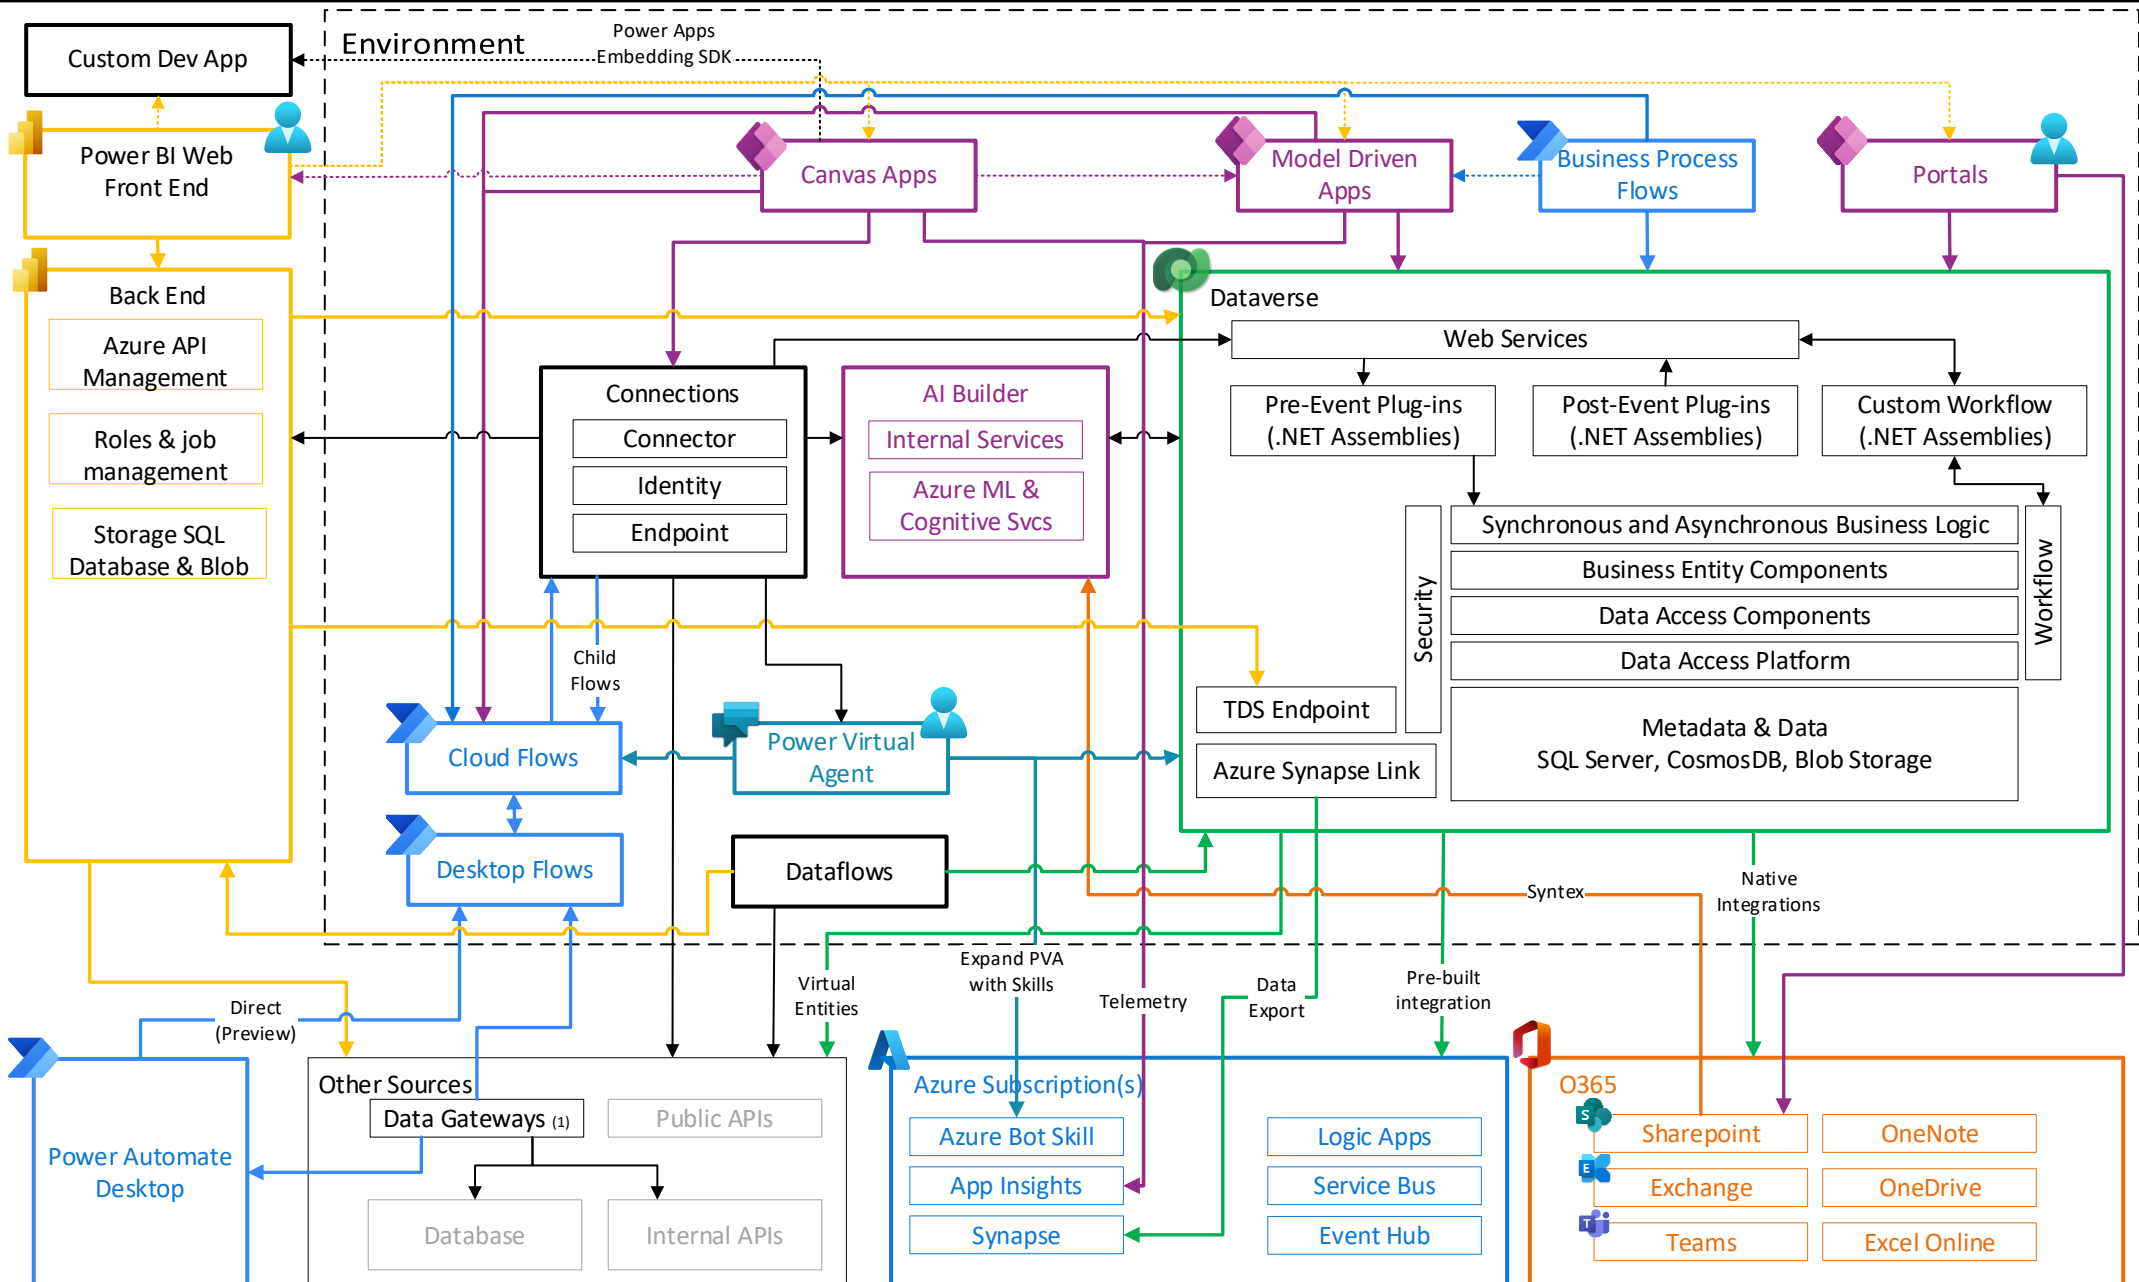

Power Apps

Power Automate

Power Virtual Agents

The level of details of this architecture is adjusted to the **expert** level to get detailed understanding of the platform. Other levels of details are available here : <https://aka.ms/pparchi>

.....→  
**UI Integration**  
(X can be embedded into Y)

→  
**Data Integration**  
(X can call Y)

↓  
**External Access**  
Can be used by users without AAD authentication

(1) Data Gateways use a WCF Azure relay for connectivity. This relay is by default managed by Microsoft, but can also be provided and managed by the customer
